SEAL
TZKA

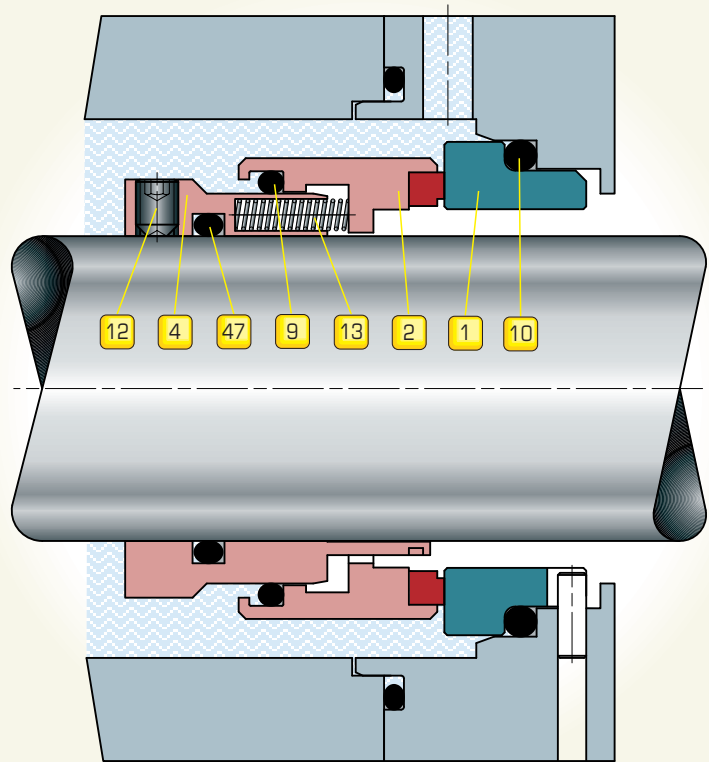

CAT009 ENG REV 12.09

The TZKA seal is a heavy-duty seal medium and high pressures. The TZKA is a single component seal, with a type A pinned stationary seat, pressure balanced, with an integral shaft sleeve. It can be fitted on parallel shafts/sleeves and it allows rotation in two directions. It is fitted with multiple springs located outside of the product, which makes it suitable for use in particularly dirty or viscous liquids. Three substantial, internal, drive lugs ensure high performance even in the case of misalignment, vibration and cavitation.

NOTES:

- 1) The material shown on this page is only part of the available range, for other products stock items, please call our Technical Sales Office.
- 2) The material should be chosen according to the operating conditions. All queries should be sent to our Technical Sales Office.
- 3) For diameter up to 100 mm the product code will then be TZKX.
- 4) The last letter of the product code TZKA shows the type A stationary seat with a slot for an antirotation pin: or if a clamped stationary seat, please request type G. The product code will then be TZKG.
- 5) Blocking system with setscrew with the end cup-shaped in dimple shaft.
- 6) When the material of the seal on the stationary seat "O" ring is the same as the seal on the rotary face "O" ring the product code is not repeated.
